Website: coming soon · address to confirm
Contact: email, location and links to confirm

Facts checked 18 November 2026 against my project records. No revenue, sales, review or usage figures are claimed anywhere in this package.
Showcase only: no source code or installers included.

OVERVIEW

Vorivant at a glance

Vorivant is the umbrella brand, and the planned website, for the products I make: six product lines, from Windows software and public data tools to spreadsheet templates and online stores. Each is described the same way, strongest public evidence first.

BRAND	ROLE	DATES	WEBSITE
Vorivant	Founder · title to confirm	to confirm	Coming soon · address

PRODUCT LINE	WHAT IT IS	WHERE	STATUS	PAGE
Arcane	Nine Windows programs for everyday PC use: installer, memory cleaner, shutdown scheduler, toolkit, game mode, controller emulator, wallpaper widget, archive manager, malware scanner.	Windows. Installers are not part of this package.	EARLY BUILD	p. 4–6
Apify Actors	Eleven public data tools on the Apify Store: eight turn Google's public pages into CSV, Excel and JSON, one exports your own GA4 data, two cover YouTube transcripts and app reviews.	apify.com/aaronoptimus	LIVE	p. 7
ClipboardCalc	Etsy shop with 70+ listings of spreadsheet templates and bundles for contractors, home daycares, treasurers and other small businesses.	etsy.com/shop/ClipboardCalc	LIVE	p. 8
Merry Keepsake Co.	Shopify store for personalized Christmas ornaments and mugs, made on demand through print on demand.	merrykeepsakeco.myshopify.com	LIVE SINCE 5 NOV 2026	p. 9
Gumroad toolkits	Five brands of digital toolkits for cleaning and janitorial businesses.	Store link to confirm	TO CONFIRM	p. 10
Tag You're Booked	Missed-call text-back for US dental practices: an automated system texts the caller. Working name.	tagyourebooked.pages.dev (coming soon)	PRE-LAUNCH	p. 10

Status key

LIVE Public and available on the date checked.

EARLY BUILD Works and tested by me, but early: not code-signed, some parts not yet run on real hardware.

PRE-LAUNCH Built or planned, not yet public.

TO CONFIRM A fact I have not yet confirmed. It is never guessed.

What this package does not contain

No revenue, sales, review, download or user numbers: none are claimed.

No source code, installers or customer names. Screenshots only where a real one exists.

Everything marked to confirm is listed on the last page.

ABOUT · HOW I WORK

How I work

The products in this package are checked the same way before anything goes public.

1

I design and direct

I choose what to build, which problem or niche to pick, what to publish and what to charge. I write the briefs and the standing rules the work follows.

Anything that touches money, identity, accounts or the public stays my decision.

2

I test and verify

Software has automated tests. Spreadsheets are opened in a real spreadsheet engine. Data tools are tested on saved real responses and then run live.

I review before anything goes live, and anything not yet verified is labeled as such.

Rules I hold myself to

Honest claims. If a number or result cannot be backed up, it is left out. Early-stage work is labeled early-stage.

Public data only. The data tools read public, logged-out pages and do not bypass logins or CAPTCHAs. The one exception by design is the GA4 Exporter, which reads your own Google Analytics properties with your own service-account key.

Tests first. The Arcane Python code has more than 700 automated tests across the suite. Each Actor ships with a test suite built on saved real responses.

Easy to leave. Each Arcane program is designed with a one-step uninstall and at most one plain confirmation. The installer declines the bundled offers it has been taught about.

One standard. A shared look, shared setup-wizard code and consistent packaging across the programs.

Own the loose ends. Each page says what is not done, not yet verified or still to confirm.

How to read the evidence

1 Public page
A link you can open yourself: the Apify Store, the Etsy shop, the Shopify store.

2 Screenshot
Taken from the program window. Shown only where a real one exists.

3 Automated tests
Counted in my own test runs. The code itself is not part of this package.

4 Dated record
My own written handoff or write-up, with its date. It is my record, not outside verification.

Skills this shows

Building: Python, PowerShell, Go, .NET (WPF), Windows APIs, PyInstaller, Node.js, Docker, web data extraction, API design, automated testing.
Product and business: product scoping, niche research, pricing and margin analysis, brand and listing design, e-commerce operations (Etsy, Shopify, Gumroad, Apify Store), listing SEO and free-traffic planning.

SOFTWARE · ARCANE

Arcane: nine Windows programs, one standard

Practical desktop programs with a shared look, shared setup-wizard code and a one-step uninstall.

STATUS	PLATFORM	STACK	EVIDENCE
EARLY BUILD	Windows	Python, PowerShell, Go, .NET (WPF), Windows APIs	700+ automated tests; 4 screenshots

1 Arcane Install

1.8.2 · Windows

Installs a ticked selection from a 43-app catalog. Skips the bundled offers it has been taught to decline, can record a new installer's screens so decline rules are added, and uninstalls in one step.

Screenshot, p. 5

2 Arcane Memory

1.8.2 · Windows; macOS (script)

Frees cached memory when the standby list is large and free memory is low, and holds a fine 0.5 ms timer resolution, which can smooth frame pacing in some games.

Screenshot to add

3 Arcane Auto Shutdown

1.8.2 · Windows

Shutdown, restart, sleep, hibernate, sign out, lock, screen off or wake on a schedule, with a live countdown and a clock-aware time editor, built on Windows Task Scheduler. Can also trigger when the PC is idle or quiet, network traffic drops (a sign downloads are done), an app closes or the battery runs low.

Limit: Waking from full power-off needs BIOS settings; not yet tested on a real PC.

Screenshot, p. 6

4 Arcane Toolkit

0.4.0 · Windows

Nine everyday tools in one tray app: window layouts and zones, launcher, smart paste, key remapping, Explorer previews, pointer helpers, light and dark switching, always-on-top and an on-screen text extractor.

Limit: Several features not yet checked on real hardware.

Screenshot to add

5 FrameLift

0.1.0 · Windows

Switches to a performance mode when a game starts and restores your settings on exit: CPU priority, a gaming power plan and background CPU hogs held back. Designed to use only normal Windows settings.

Limit: Power-plan and CPU-set modes not yet checked on real hardware.

Screenshot to add

6 Rolla Boy

0.4.2 · Windows

Presents a GameSir G7 Pro 8K or Sony DualShock 4 to games as a virtual Xbox 360 controller. Two controllers at once, each with its own profile, sticks, triggers, vibration and light bar.

Screenshot, p. 6

7 Scenic Wallpaper

1.1.0 · Windows (Linux code exists, not yet verified)

Small see-through desktop widget that sets a new landscape photo as your wallpaper. Skips black-and-white and some non-scenic shots, avoids repeats until a search runs out of new photos, and saves each photographer's credit.

Screenshot to add

8 ZipFlow

1.2.1 · Windows

ZIP and TAR manager. Files are checked with the SentinelScan engine as they extract. Does not edit archives in place.

Limit: Some risky file types (.chm, .reg, .url, .msc, .msix) are not yet scanned. 1.2.1 not yet run on a real PC.

Screenshot, p. 6

9 SentinelScan

0.2.2 · Windows (macOS and Linux builds are older and unverified)

Malware scanner with real-time protection and quarantine. A Rescue USB edition is in development (source only so far).

Limit: Early build: no detection benchmarks or independent test results are claimed. macOS and Linux builds not yet run on real machines.

Screenshot to add

Versions are the newest builds in my November 2026 notes. Early releases, not code-signed: Windows SmartScreen may warn.

SOFTWARE · ARCANE · FLAGSHIP

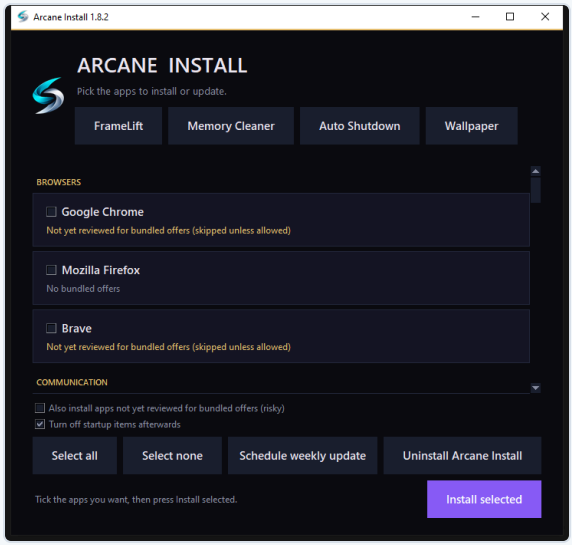

Arcane Install

A Ninite-style installer: one admin program that sets up a fresh Windows PC from a 43-app catalog and skips the bundled offers that make setup tedious.

VERSION	PLATFORM	STATUS	TESTS
1.8.2	Windows	EARLY BUILD	700+ automated, suite-wide

What it does

- Installs a ticked selection of apps from a 43-app catalog in one run.
- Declines the bundled toolbars and offers it has been taught about. Apps not yet reviewed are skipped unless you allow them. A “learn” mode records how a new installer asks so decline rules can be added to the catalog.
- Shows plain progress: an orange “Working” state that turns green on “Done”.
- Is designed to have its own entry in Windows Settings and a one-step uninstall (not yet run end to end on a clean PC).
- Carries my own small programs (Arcane Memory, Auto Shutdown, ZipFlow and others) as optional installs.

Arcane Install 1.8.2 — catalog with bundled-offer status per app.

Decisions I made

- **One exe, not a folder.** Everything ships in a single admin program, Ninite-style.
- **Decline by default.** The catalog stores how each installer’s offers are declined, so the user is not asked.
- **Build, don’t bundle.** I replaced third-party memory-cleaner and auto-shutdown utilities in the catalog with my own built-in programs.
- **No console windows** over installers, and a one-step uninstall designed into every program.

What is and is not proven

The suite’s Python code is covered by 700+ automated tests, and earlier Arcane Install builds have been run on my own PC. Not code-signed, so SmartScreen warns. The newest builds have been checked in a sandbox but not yet installed on a clean machine.

Engineering highlights across the suite

Shared setup-wizard code with license, notices and uninstall handled the same way across the suite.

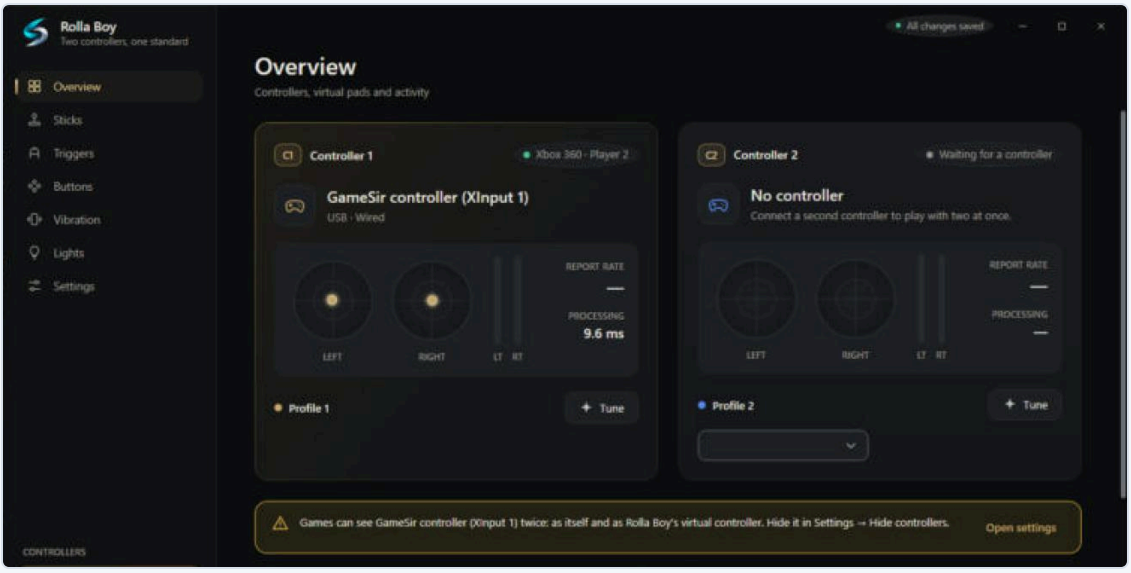

Safety by design. ZipFlow checks extracted files with the SentinelScan engine (a few risky file types are not yet covered) and does not edit archives in place. FrameLift is designed to use only normal Windows settings.

Consistent packaging. Each program ships with its own setup file, license, readme and notices.

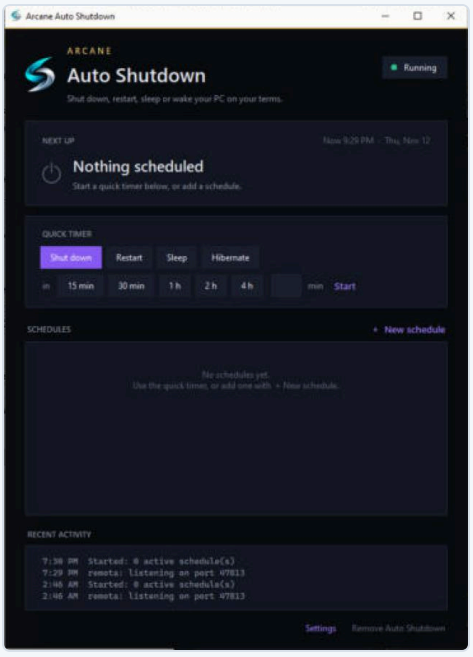

SOFTWARE · ARCANE · IN USE

More from the suite

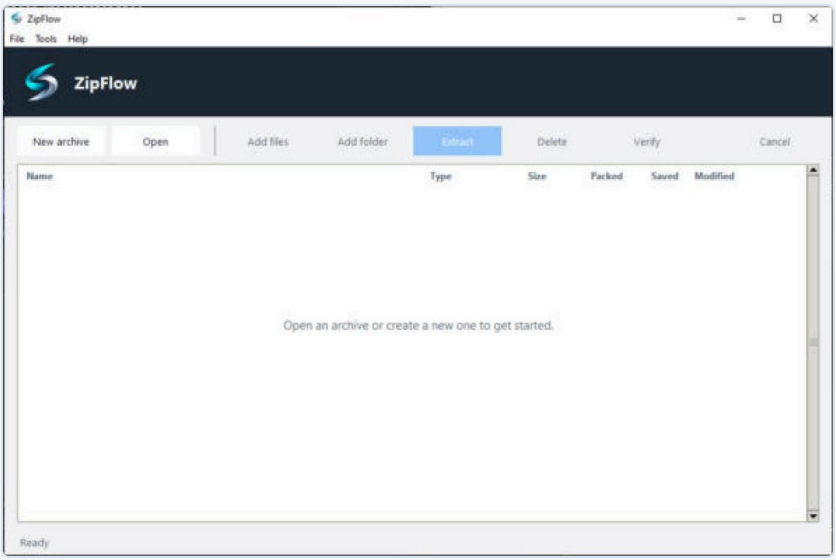

Screenshots of the program windows, shown only where a real one exists.

Rolla Boy 0.4.2. Two controller slots, each with its own profile, sticks, triggers and vibration. An earlier build has been run on my own PC.

Arcane Auto Shutdown. Quick timer, schedules and a recent-activity log. An earlier build has been run on my own PC; waking from full power-off needs BIOS settings and is not yet tested.

ZipFlow 1.2.1. An archive-manager window; extracted files are checked with the SentinelScan engine. Checked in a sandbox and Wine, not yet on a real PC; a few risky file types (.chm, .reg, .url, .msc, .msix) are not yet scanned.

Still to add

Screenshots for Arcane Memory, Arcane Toolkit, FrameLift, Scenic Wallpaper and SentinelScan. I would rather leave the gap than show anything that is not a real capture.

DATA TOOLS · APIFY STORE

Apify Actors: Google's public data, ready to use

Public data tools on the Apify Store that turn Google's public pages (and, for GA4, your own analytics) into clean CSV, Excel and JSON, for people and for AI agents. Each takes a public service with no practical export button and returns tidy structured data.

STATUS	TOOLS	STORE	PRICING
LIVE	11 (9 Google, 2 other)	apify.com/aaronoptimus	Pay per event: small start fee plus a fee per result

1 Google Trends Scraper

Compare up to 100 keywords on Google Trends in one run, and pull Trending Now topics.

apify.com/aaronoptimus/google-trends-scraper

2 Google Autocomplete Keyword Ideas

Turn one seed keyword into hundreds of real search suggestions, with Trends scores.

apify.com/aaronoptimus/google-autocomplete-scraper

3 Google Hotels Scraper

Hotel prices and rates for your dates, with booking-site prices as an optional add-on.

apify.com/aaronoptimus/google-hotels-scraper

4 Google Flights Scraper

Airfare, booking options and a price calendar.

apify.com/aaronoptimus/google-flights-scraper

5 Google Jobs Scraper

Job listings with salaries and apply links, about ten jobs per search page.

UNDER MAINTENANCE Listed as under maintenance on 18 Nov 2026

apify.com/aaronoptimus/google-jobs-scraper

6 Google News Scraper

Headlines by topic and by city, with real publisher links.

apify.com/aaronoptimus/google-news-scraper

7 PageSpeed Insights Bulk Audit

Lighthouse scores and Core Web Vitals for hundreds of URLs at once.

apify.com/aaronoptimus/pagespeed-insights-bulk-audit

8 Google Ads Transparency Scraper

See the ads a competitor is running.

apify.com/aaronoptimus/google-ads-transparency-scraper

9 Google Analytics 4 Exporter

Export GA4 reports to CSV, Excel or JSON for many properties, with your own service-account key.

apify.com/aaronoptimus/google-analytics-4-exporter

10 YouTube Transcripts Scraper

Video captions as text, SRT, VTT or JSON, plus chapters and comments.

apify.com/aaronoptimus/youtube-transcripts-scraper

11 App Store & Google Play Reviews Scraper

iOS App Store and Google Play reviews, ratings and app details.

apify.com/aaronoptimus/app-store-reviews-scraper

All 11 Actors

Every Actor is listed on the publisher page, with its Store description and pricing.

apify.com/aaronoptimus

How I build them

- **Test-first.** Automated tests on saved real responses, then live runs.
- **Honest data rules.** Public, logged-out data only (the GA4 Exporter reads your own properties with your own key); no CAPTCHA bypass, no personal data.
- **Clear pricing.** Pay per event: a small start fee per run plus a fee per result delivered, with no separate platform usage fees. Exact pricing is on each Actor's page.
- **Agent-ready.** Available through the Apify MCP server, Zapier and Make; some also list n8n.

Stack: Node.js, web data extraction, API design, automated testing, Docker, MCP. **Evidence:** the public Store pages linked above; no reviews, user counts or rankings are claimed. These tools are independent and not affiliated with or endorsed by Google.

DIGITAL PRODUCTS · ETSY

ClipboardCalc: spreadsheets that do the math

Business Spreadsheets for Trades & Treasurers. Small-business spreadsheet templates for Excel and Google Sheets. A trucker, church treasurer or plumber types into the yellow cells and gets profit, tax set-asides, job costs and budget-versus-actual, with no formulas to build.

STATUS	CATALOG	PRICES	SHOP	FORMERLY
LIVE	70+ listings: single templates and bundles	Singles $11.99–$19.99; bundles $27.99–$34.99	etsy.com/shop/ClipboardCalc	Pennywren Studio (renamed November 2026)

The idea

Many Etsy spreadsheet templates chase crowded searches: budget planners, habit trackers, generic bookkeeping. ClipboardCalc builds for small businesses few sellers build for, from vending routes and home daycares to booster clubs and snow removal. Each product starts with research on what buyers in that trade search for.

The product

- One .xlsx per template for Excel 2019 or newer and free Google Sheets, sold as an instant download with a filled sample and a blank copy.
- One design language: Start Here and Settings tabs, yellow cells to type in and white cells that calculate, dropdowns, a dashboard with KPI tiles and charts, printable outputs where a trade needs them.
- Quality bar, checked at each build: formulas verified, zero error cells, no macros or external links.

How each product is made

1 Research → 2 Build → 3 Test → 4 Images and video → 5 Listing copy → 6 Shop management → 7 Distribution

I review at set gates. Every workbook is opened in a real spreadsheet engine and scanned for errors.

The catalog: seven spreadsheet sections

SHOP SECTION	EXAMPLES
Bundles: Save More	Small Business Finance Bundle, Self-Employed Tax Season Pack, HVAC Service Owner Pack
Trades & Field Service	Contractor Estimate & Job Costing, HVAC, Plumbing, Roofing, Snow Removal
Bookkeeping & Taxes	Profit & Loss Dashboard, Quarterly Tax Estimator, Mileage Log
Nonprofits & Treasurers	Treasurer Ledger & Giving Statements, Grant Tracker, HOA Treasurer
Home & Side Businesses	Home Daycare Billing & Tax Tracker, Vending Route Tracker, Food Truck, Beekeeping
Pricing & Inventory	Inventory & COGS Tracker, Etsy Seller Profit Calculator
Wedding Planning	Wedding Planner: Budget, Guests & Seating

My role

I choose which niches to build, review each listing before it goes live, set prices and sales, and approve anything that spends money or appears in public.

Status and what is next

Live and still new. Three more are built and in review (real estate transaction tracker, tips-and-overtime payroll sheet, interior-design FF&E budget). Next is reach, not catalog: Pinterest pins, weekly search-rank checks and a seasonal sale calendar. No sales or review figures are claimed.

ONLINE STORE · SHOPIFY

Merry Keepsake Co.: add one every year

A Shopify store for personalized Christmas ornaments and mugs, made and shipped on demand through print on demand, so there is no inventory to hold. Its idea: a numbered-seal ornament series that turns a one-off gift into a yearly collectible.

STATUS	CATALOG	BUILT	STORE
LIVE SINCE 5 NOV 2026	17 products: 16 personalized plus a gift card	7 Oct – 5 Nov 2026	merrykeepsakeco.myshopify.com

The challenge

Launch a Shopify business before the Christmas rush on a near-zero budget, with no inventory and the owner spending as little time as possible.

Identity and accounts

I handled the identity, payment and account steps myself.

Brand system

Evergreen pine, cream lettering and a gilt seal ring. Fonts: Fraunces and Nunito Sans.

- Pine #1F4D3A
- Ink #1B2A22
- Cream #FAF6EF
- Linen #F1E9DC
- Cranberry #A4243B
- Gold #8A6A3B

What was built

Market research. Chose personalized holiday gifts, where my research found specific niches (pet photo, baby's first, family names, teacher and nurse gifts) less crowded than generic products.

Store build. 16 personalized products plus a gift card, 9 collections, policies, branded notifications, a live personalization preview, and bundle and Black Friday discounts, on Shopify's free theme and a free print-on-demand tier.

Free-traffic plan, ready to run. 91 designed Pinterest pins (a 65-pin import file with tracked links is ready), 10 short-video scripts, drafted email flows and friends-and-family texts. As of 18 Nov none had been posted or sent yet.

Full brand system. Logo, palette, typography, voice rules, five print templates and a strict honesty policy on claims.

Profit engineering. Per-order margins modeled with real supplier costs, free shipping at $35 and a 3+ bundle, and a research study that tested prices, conversion, traffic, catalog and deadlines.

Honesty rules. Only "Printed in the USA", true-size photos and clear order-by dates; no "handmade" or "bestseller".

Status so far

Opened on 5 November 2026 with 17 products, then passed a full audit (10 Nov) and test orders. As of the last store check (12 Nov) there were no customer orders yet. The research found the limit is traffic, not pricing, which set the focus on free marketing channels. No sales or reviews are claimed.

Skills shown

E-commerce strategy, brand design, Shopify, print-on-demand operations, pricing and margin analysis, listing SEO and free-traffic planning.

DIGITAL PRODUCTS · GUMROAD

Gumroad toolkits

Five brands of digital toolkits for cleaning and janitorial service businesses, planned for one Gumroad storefront. Prices are as planned. At my last record three one-time products were published and delivery-tested; which are live today is still to be confirmed, and both memberships are closed for now.

STATUS	BRANDS	AUDIENCE	STORE
TO CONFIRM	5 brands, 7 priced offers	Cleaning and janitorial businesses	Link to confirm

BRAND	PRODUCT	PLANNED PRICE	STATUS
Fair Scope Kit	**Cleaning Scope & Cost Toolkit** Records extra cleaning scope and costs. Offline app, Excel workbook and templates.	$39 once	TO CONFIRM
Inquiry Ready Widget	**Cleaning Website Planner Builder** Branded planning widget exported as standalone HTML.	$19 single client $79 Agency Ten	TO CONFIRM
Sparkle Promo Kit	**Cleaning Campaign Studio & Vector Kit** Coordinated service-business artwork with a local campaign editor.	$29 single brand $59 agency	TO CONFIRM
Retavryn	**Recurring Contract Margin Workspace** Membership.	$19 / month	CLOSED FOR NOW
BidTavora	**Janitorial Opportunity Briefs** Membership.	$29 / month	CLOSED FOR NOW

No sales, downloads or reviews are claimed. Each toolkit page will be linked once I confirm what is live.

SERVICE · DENTAL PRACTICES

Tag You're Booked working name, not final

A done-for-you service for US dental practices. When a call is missed, the system is designed to text the caller two open appointment times, and the patient books by replying. The texts are sent by an automated system, not by a person at the practice.

STATUS	WHO SENDS THE TEXT	BUILT ON	PRICING
PRE-LAUNCH	An automated system	GoHighLevel	to be added

How it works

- A missed call is designed to trigger an automatic text offering two open times.
- The patient books by replying.
- Urgent or unclear messages are meant to go to a person. The service is designed to give no clinical or insurance advice.

Status and what is next

Built as a specification and middleware; not launched, and the website (tagyourebooked.pages.dev) is coming soon, not live. No clients, results or customer names are claimed. A later add-on is planned: an after-hours voice receptionist, also automated.

VERIFICATION AND LIMITS

What is verified, what is not, and what is open

I would rather show the gaps than let a reader find them. This page is the honest ledger for the rest of the package.

PRODUCT LINE	CHECKED AGAINST	NOT YET VERIFIED
Arcane	Release notes and build records; screenshots of four programs; 700+ automated tests across the Python code.	Not code-signed. Newest builds checked in a sandbox and Wine, not yet installed on a clean PC. macOS and Linux builds not run on real devices. Version numbers differ across my release notes, so the newest recorded build is shown. Five programs lack screenshots.
Apify Actors	My Actor write-up; all 11 Actor pages and the publisher page opened on 18 November 2026.	Google Jobs Actor listed as under maintenance on 18 November 2026. No usage figures claimed.
ClipboardCalc	Shop write-up dated 18 November 2026: sections, examples and price ranges. Live shop address and section counts opened on 19 Nov 2026.	Three more products in review. No sales figures claimed.
Merry Keepsake	Project handoff dated 18 November 2026; store audit of 10 Nov.	No customer orders as of 12 Nov. Pinterest, Google listings and outreach prepared but not yet run.
Gumroad	Launch kit and 13 Oct handoff.	Which products are live today; store link.
Tag You’re Booked	Project specification.	Not launched. Pricing not set.

Open items, all marked to confirm in this package

- Vorivant website address
- My title and dates for Vorivant
- Contact details and public links
- Which Gumroad toolkits are live, and the store link
- Tag You’re Booked pricing and launch date
- Screenshots for Memory, Toolkit, FrameLift, Scenic Wallpaper and SentinelScan
- Whether the Google Jobs Actor is back online
- Any further Actors to list
